

MOSTAFA HIGAZY

FULL-STACK SOFTWARE
ENGINEER

PROFILE

Full-Stack Software Engineer, Experienced in Laravel, PHP, React, Next.js, Tailwind CSS, Firebase, C++. I build, maintain and design websites using Laravel/PHP, ReactJS, Next.js, Firebase and TailwindCSS. Currently a computer engineering student at Bilkent University.

EXPERIENCE

- **Jun 22 - Present** **LEA Growing People**
Internship, Remote/Dubai
Software Developer. Helped with the digitization and automation of the company. Creating a platform for clients and coaches to interact with each other and to help automate some of the processes required for the provision of services.
- **May 22 - Jun 22** **Virtual Cloud Information Technology LLC**
Internship, Dubai
Software Engineer. Helped design and maintain software for the company.
- **Jan 22 - Mar 22** **Codify College AB**
Internship, Remote/Sweden
Software Developer.

EDUCATION

- **2020 - Present** **Computer Engineering**
BILKENT UNIVERSITY, Ankara
Computer engineering is a science and engineering discipline that deals with computer systems, data and information processing, and computer applications in all aspects.

PROJECTS

- Mar 22 - Jun 22 **BILHEAL**
Associated with Bilkent University
BilHeal is a proposed web app for Bilkent University's Health Center that aims to ease the interaction between patients and the health centre's staff. It was created as a group project for the Object-Oriented Software Engineering course.
- Feb 22 - Apr 22 **UFPE CLUB**
Private Contractor
Created a web 3 Dapp that allows users to mint unique NFTs as a Proof Of Concept/Minimum Viable Product for a client. The project was deployed to the Rinkeby test network. The contract was written using Solana, and the landing page was created using Next.js and TailwindCSS.
- Dec 21 - Feb 22 **RESTAURANT REVIEWS WEBSITE**
Personal Project
Restaurant Review example website created using the MERN stack.

SEEEM MUSIC APPLICATION

Associated with Bilkent University
This app was created with the help of fellow students as a project for our computer science course. The app contains many features, and gave us experience in Android development, and solidified our grasp of MVC principles. Tools, such as Firebase and Android Studio helped us unleash the full potential of this app.

COURSEWORK

2020-2021	ALGORITHMS AND PROGRAMMING I & II <i>BILKENT UNIVERSITY, Ankara</i> The ultimate goal of these courses is to produce a commercial-quality program which is fully documented, bug-free and easy to use.
2021-2022	FUNDAMENTAL STRUCTURES OF COMPUTER SCIENCE I & II <i>BILKENT UNIVERSITY, Ankara</i> Discussing concepts related to algorithmic efficiency on basic abstract data types and some sorting algorithms
2021-2022	OBJECT-ORIENTED SOFTWARE ENGINEERING <i>Organisation, City</i> Overview of object-oriented software modeling with Unified Modeling Language and exposure to CASE tools for object-oriented development. Experience with such tools and environments through programming assignments and/or a term project.

VOLUNTEER WORK

TRANSLATOR
