Abu Dhabi, U.A.E | Cairo, Egypt

Passionate about performant web technologies and building scalable solutions

SKILLS

- **Frontend:** React, Next.js, TailwindCSS, Alpine.js, Livewire
- **Backend:** Laravel, Node.js, Express.js, Symfony, Stripe API, Intercom API
- **Cloud:** AWS (EBS, RDS, IAM, Route53), Vercel, Cloudflare
- **Databases:** SQL, GraphQL, MongoDB, Firebase, Supabase, DynamoDB
- **Languages:** Python, PHP, JavaScript, TypeScript
- **Other:** Agile Methodologies, CI/CD, Pest, Jest

EXPERIENCE

MyEdSpace - Full-Stack Engineer

Feb 2025 - PRESENT

- Engineered LMS platform backend using Symfony and Laravel, architecting robust API endpoints integrated with OpenAPI specifications for standardized documentation and frontend consumption.
- Implemented video attendance tracking and complex publishing status systems for educational entities, utilizing Symfony's service container and event listeners for scalable business logic.
- Developed image upload infrastructure and subject selection UI overhauls using React, streamlining content management workflows.
- Integrated Intercom messaging and custom Stripe payment logic for installment plans, ensuring secure and seamless financial transactions.
- Optimized SEO frameworks and deployment pipelines while resolving legacy payment issues to improve platform reliability and user experience.

Opskit - Full-Stack Engineer

Dec 2023 - Feb 2025

- Designed and developed interactive data visualization dashboards for mine operators using D3.js, TailwindCSS, GraphQL, Amplify Studio, and React to enable real-time insights
- Contributed to multiple scalable products for mine supervisors, focusing on user-centric features and performance optimizations
- Collaborated in agile teams to deliver high-impact solutions, integrating frontend and backend components for seamless operations

LEA Growing People - Full-Stack Engineer

Jun 2022 - Sep 2024

- Reduced onboarding process time by 80% through a custom system built with Next.js, React, Node.js, Express.js, TailwindCSS, and Firebase
- Designed and developed a coaching platform enabling coaches to deliver solutions to clients, emphasizing scalable architecture and intuitive interfaces

-
- Created comprehensive user documentation to maximize platform adoption and support self-service workflows

[Stealth Startup](#) - Full-Stack Engineer

Nov 2022 - Dec 2023

- Developed 7 cutting-edge WordPress plugins in the web-3 domain, incorporating modern PHP and JavaScript best practices
- Migrated plugins to a monorepo structure, improving internal workflows and collaboration in agile sprints with daily standups
- Implemented user-centric interfaces using TailwindCSS and Sass, ensuring visually appealing and responsive designs

[Freelance](#) - Full-Stack Engineer

Jan 2021 - Dec 2023

- Built a web-3 DApp for NFT minting and wallet integration (OpenSea, MetaMask) using IPFS, MongoDB, Next.js, React, Node.js, Express.js, TailwindCSS, Hardhat, and Truffle
- Created an AI-powered app for generating children's stories with Django, Next.js, React, Node.js, Express.js, TailwindCSS, and AWS (EBS, RDS, IAM, Route53)
- Delivered full-stack websites and apps using MERN and TALL stacks, focusing on mobile-first responsive designs for diverse business needs

[BlessHost](#) - Frontend Engineer

Jan 2018 - Jan 2021

- Designed and developed full-stack websites and apps using MERN and TALL
- Created mobile-first responsive sites for various businesses, optimizing for user experience and load times

EDUCATION

[University of London](#) *BSc. Computer Science*

[Bilkent University](#) *BSc. Computer Engineering*

VOLUNTEERING

[Google Developer Student Club](#) - Tech Instructor

Oct 2023 - Oct 2024

- Led the initiative to forge a strategic partnership between Chingu.io and Google Developer Student Clubs (GDSC), coordinating with both teams to ensure seamless collaboration

[Catchafire](#) - Full-Stack Engineer

Sep 2023 - PRESENT

- I volunteered my skills through Catchafire, donating over \$20,000 in development and engineering time to help various causes
